Please indicate the most relevant research module for your project:

- Module 1:** "Sex/gender as a determinant of health"
- Module 2:** "Sex/gender in health care and clinical practice"
- Module 3:** "Sex/gender at the public health and policy levels"

If applicable, please indicate which research module(s) is/are also relevant for your project:

- Module 1:** "Sex/gender as a determinant of health"
- Module 2:** "Sex/gender in health care and clinical practice"
- Module 3:** "Sex/gender at the public health and policy levels"

*Please list three publications from third parties (not yours) considered most relevant for the proposed project:*

- 1.
- 2.
- 3.

*Please list the three most relevant publications of your team:*

- 1.
- 2.
- 3.

# Project Description

## 1 Research topic and objective of the project

*Contextual background and problem that your project will address. Specification of the objectives of the project and their match the NRP 83 programme aims. Formulation of the main research question.*

## 2 State of research

*Systematic overview of the most important previous findings and research approaches specific to your research topic.*

## 3 Research plan: approaches and methods

*Description of the planned research activities, approaches, and methods of your project. Description of roles and responsibilities of all involved applicants and partners and the availability of data.*

*If your project is part of an ongoing Swiss cohort or clinical trial, please indicate the confirmed funds from third-party in this section.*

## 4 Sex/gender dimensions in the research design

*Information on how biological and social dimensions of sex/gender and their interactions are included and conceptualized in the research design.*

## 5 Expected benefits, implementation and application of results

*Outline of expected benefits for stakeholder groups, potential for application, and planned implementation activities. Characterization of the project's contribution towards fulfilling the objectives of the programme.*

## 6 Timeframe and milestones

*Description of general timeframe and relevant milestones to achieve.*

## 7 References

*List of the sources of all work referred to in the research plan.*
